

## 1. Tell us about yourself

Ans: Thanks, Ok I am a good, passionate, competent web developer who over the months has built a diverse range of skills, qualities, and attributes that guarantee I will perform highly in this role. I have worked out alone for the last few months. And also, I am confident enough to develop myself in teamwork efficiently. I have experience of 5/6 months on web developing. I am much comfortable with the react-js library for JavaScript. I am very much capable of fast learning. I ensure you I can do challenging web development projects. I take my passion as a web developer and this means I always ensure my skills are kept up to date. If you hire me I'll ensure you I'll fit quickly with your team.

## 2. Tell me about your best projects and what obstacle you faced to develop that project.

Ans: Ok, Thanks. I made a project about a niche product website. On that, I have some product of the same type. I have made an authentication system, for that project. According to log-in authentication, I've implemented two sides. One is the user login side and another is the admin login side. For user experiences, a user may add products, remove his product and also give feedback. I have a route for the payment gateway system. But I didn't implement any payment gateway. Because I am improving my knowledge about this. I'll add the system. I want to add that I make an admin page. Where I found a few

obstacles. I couldn't implement the toggle mode of user and admin. I got some barriers at that time. But I realize it was too easy after I implement this by thinking a lot of times. An Admin can perform a few tasks you may show.

### 3. Why Should We Hire You?

Ans: Honestly saying I have owned all the skills and capabilities that you guys are looking for. I am pretty confident enough that I can be the best candidate for this job. And You may see that I am studying computer science and engineering. I have a passion for web development. And furthermore, doing of very large projects. I am now the best at my position. I can learn fast. If you're giving me a demo project for testing or a different purpose I'll be ready to do that.

### 4. What is Your Expected Salary?

Ans: Frankly saying at this stage, I just want to develop myself as a serious developer and I wish to work on some great or large projects. I normally focused on my learning and competitive work project in career objective at now. And I'm sure you guys all are fixing a competitive salary range. I'm comfortable enough with your ranges.

5. Do You have any questions?

Ans:

- a. Yes, I have got a few questions. Just tell me sir if I join your team what activities I'll do for.
- b. What technologies you are using in addition?
- c. Why you are using this technology instead of this?
- d. What advantages I'll get if you're hired me?
